

a

Runtime lifecycle verdicts

Property	Before	Receive pending	Schedule pending	After apply
Attack blocked (0x2E 1234)	✗	✗	✗	✓
Benign read passes (0x22 1001)	✓	✓	✓	✓
Expected lifecycle behavior	✓	✓	✓	✓

Checks show receive/schedule are observable pending states; only apply closes the attack path.

b

Latency does not spike during staged runtime patching
